Compiled from public reporting and summarised in our own words. Every incident links to its original source. Severity: critical means wide impact, such as essential services disrupted or sensitive data exposed at scale; major means notable impact on one organisation's customers or a widely used service; minor is limited, brief or local. Outage status: ongoing (still disrupted at last report), partially restored, reported (state not yet confirmed), resolved, or post-mortem (cause explained by the provider). "Claimed" marks figures from attackers that the organisation has not confirmed.
